Summary

A highly motivated and detail-oriented QA Analyst with a strong focus on ensuring software quality through rigorous testing methodologies. Experienced in developing and executing test cases, identifying and reporting defects, and contributing to the overall stability of applications within an Agile environment.

Skills

- Selenium
- TestNG
- JUnit
- Agile Testing
- Manual Testing
- Bug Reporting
- Test Case Design
- Defect Tracking

Experience

QA Analyst | QualityFirst Solutions | 2018 – Present

- Developed and executed comprehensive test cases for various software applications, covering functional, regression, and integration testing.
- Identified, documented, and tracked software defects using bug tracking systems (e.g., Jira).
- Collaborated with developers to reproduce and verify defect fixes.
- Contributed to the creation of test plans and test strategies.
- Participated in Agile sprint ceremonies and provided timely feedback on product increments.

Education

Bachelor of Science in Information Technology | Rajasthan University | 2018

- Relevant coursework included Software Testing, Database Management Systems, and Computer Networks.

Projects

- **Test Automation Project:** Designed and implemented automated test scripts using Selenium WebDriver for a web application, improving testing efficiency and coverage.
 - **Regression Testing:** Conducted thorough regression testing on existing software modules to ensure stability after code changes.
-
